BY CYBOLT

Threat intelligence and incident response

[Learn more](#)

We protect your company's infrastructure and digital assets by effectively detecting, resolving, and mitigating cybersecurity incidents. An Incident Response Team dedicated to monitoring the digital world to protect your company. Driven by scientific methodology, deep expertise, and strong commitment.

What is a CSIRT?

We protect your company against cyber threats

[Discover our approach](#)

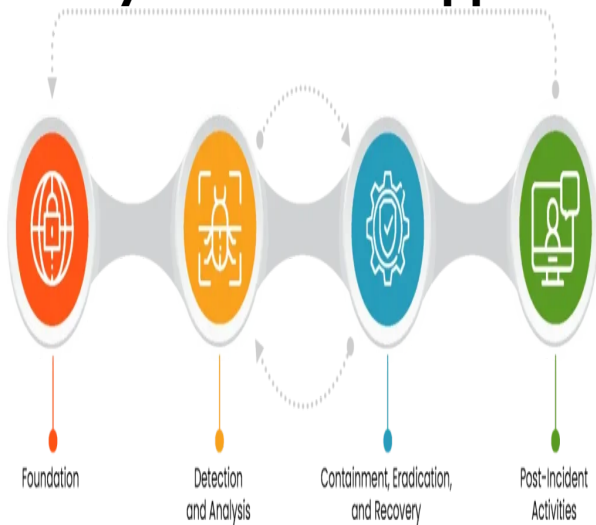

At the core of our approach is our CSIRT, a specialized team dedicated to the investigation, detection, analysis, mitigation, and response to cybersecurity incidents. We work tirelessly to protect organizations from cyber threats and support their recovery post-incident.

At BeaconLab, we are committed to delivering support, collaboration, and guidance throughout security incidents and providing recommendations to prevent future occurrences. We utilize cutting-edge investigative processes and the latest technologies to safeguard your digital assets.

If you have any questions or need cybersecurity assistance, please don't hesitate to reach out to our team.

Our cyber incident approach

At BeaconLab, we follow the NIST incident response framework, which consists of four key phases. In the **foundation** phase, response plans are developed, a dedicated team is assigned, and security measures are implemented. During the **detection** and **analysis** phase, systems and networks are monitored, and the nature and scope of the incident are thoroughly investigated. The **containment, eradication, and recovery** phase focuses on taking decisive steps to contain and eliminate the incident, as well as restore normal operations. Finally, in the **post-incident** phase, the incident is reviewed, actions taken are documented, and improvements are implemented to prevent future incidents.

In addition to following this industry-standard framework, BeaconLab is an active member of FIRST, adhering to its regulations and actively collaborating with the global CSIRT community.
