Subject: Alert 2024-25 Critical RCE Vulnerabilities in Veeam

Traffic Light Protocol (TLP): White

The **Veeam team** has released a series of vulnerabilities along with their respective security patches. Among these, several could seriously impact the security of organizations, notably **CVE-2024-40710** and **CVE-2024-40711**, which are **remote code execution (RCE)** vulnerabilities.

We strongly recommend taking action and applying the security patches published by the manufacturer.
